

HabaCHAIN®

Slat and Conveyor Chains

Product Guide

This **disclaimer** is made by and on behalf of Habasit and its affiliated companies, directors, employees, agents and contractors (hereinafter collectively "HABASIT") with respect to the products referred to herein (the "Products").

SAFETY WARNINGS SHOULD BE READ CAREFULLY AND ANY RECOMMENDED SAFETY PRECAUTIONS FOLLOWED STRICTLY!

Please refer to the Safety Warnings herein, in the Habasit catalogue as well as installation and operating manuals.

All indications / information as to the application, use and performance of the Products are recommendations provided with due diligence and care, but no representations or warranties of any kind are made as to their completeness, accuracy or suitability for a particular purpose. The data provided herein are based on laboratory application with small-scale test equipment, running at standard conditions, and do not necessarily match product performance in industrial use. New knowledge and experience may lead to re-assessments and modifications within a short period of time and without prior notice.

EXCEPT AS EXPLICITLY WARRANTED BY HABASIT, WHICH WARRANTIES ARE EXCLUSIVE AND IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, THE PRODUCTS ARE PROVIDED "AS IS". HABASIT DISCLAIMS ALL OTHER WARRANTIES, EITHER EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, NON-INFRINGEMENT, OR ARISING FROM A COURSE OF DEALING, USAGE, OR TRADE PRACTICE, ALL OF WHICH ARE HEREBY EXCLUDED TO THE EXTENT ALLOWED BY APPLICABLE LAW. BECAUSE CONDITIONS OF USE IN INDUSTRIAL APPLICATION ARE OUTSIDE OF HABASIT'S CONTROL, HABASIT DOES NOT ASSUME ANY LIABILITY CONCERNING THE SUITABILITY AND PROCESS ABILITY OF THE PRODUCTS, INCLUDING INDICATIONS ON PROCESS RESULTS AND OUTPUT.

WARNING

Habasit belts and chains are made of various plastics that WILL BURN if exposed to sparks, incendiaries, open flame or excessive heat. NEVER expose plastic belts and chains to a potential source of ignition. Flames resulting from burning plastics may emit TOXIC SMOKE and gasses as well as cause SERIOUS INJURIES and PROPERTY DAMAGE. See the Fire Hazard Data Sheet for additional information.

Chemical resistance – Steel	126
Safety information	127
Solutions in motion	128

Slat Top plastic chains

Available in straight running 820, 821, 828 and 831. Radius chain available in 879, 880, 882 and 1061. Tight turning radius available in 770 and 890.

Low Back pressure chains

Standard version 821 and 882 as well as patented sliding block system available.

Slat Top Steel chains

Available in four steel qualities and designed for the beverage industry, as well as for heavy duty, high temperature and static electricity applications.

Flexi chains

For standardized modular conveyor systems made of aluminum or steel profiles.

Snap-on chains

Two-piece chain with steel roller base chain and plastic top plate. Base chains in two dimensions (ANSI 40 = 0.5" pitch or ANSI 60 = 0.75" pitch) and made of carbon or stainless steel.

Multiflex chains

The 1700, 1701T and 1702 are heavy duty biplanar chains. Applications include alpine systems (inline accumulation) and case conveyors.

Case chains

Case chains are available in many different designs ranging from 0.5" pitch to 3.25" pitch. The popular 1200/3200 series chain was developed and patented.

Multi-Hub sprockets and idlers

Different split sprockets or idlers can be combined with different hub inserts.

Solid sprockets and idlers

Machined or molded solid sprockets and idlers. Made of plastics or steel.

Split sprockets

Machined split sprockets

Retainer rings

For lateral fixation of sprockets and idlers on round and square shafts.

Chain 1873 **Version** Snap-on **Width** 12.00 inch **Accessory** Custom insert type B

Material LF **Link design** Tab **Style** Standard

Extension Accessory on every 11th module per 10 ft

C1200P224K2DPAA-031

Chain 1200 **Version** AISI 304 pin **Width** 2.24 inch **Accessory** Plastic tab two holes (two sides)

Material DP **Link design** Standard **Style** Standard

Extension Accessory on every third module per 10 ft and color white

CNH78P291EPLFAA-157

Chain NH78 **Version** AISI 304 pin **Width** 2.91 inch **Accessory** Extended pin

Material LF **Link design** Standard **Style** Standard

Extension Accessory on every 15th module per 10 ft and pin diameter 7/16 inch

C7100T325

Chain 7100 **Version** Pin tool **Width** 3.25 inch

Plastic chains

HabaCHAIN® products are made of high quality plastics from the best raw material producers. Habasit's program of studying material applications ensures the most suitable plastic type material for the particular conditions, as listed below:

Plastic chains – Standard chain materials				
Material	Description	Density [g/cm ³]	Temperature range	Standard color
DP	Standard POM (Acetal) ¹⁾ with good strength and good coefficient of friction. Entry level material for standard or low speed applications.	1.42	Dry conditions: -40 °C to +93 °C (-40 °F to +200 °F) Wet conditions: -40 °C to +60 °C (-40 °F to +140 °F)	Gray
LF	Low-friction POM (Acetal) ¹⁾ with high strength and good abrasion resistance. Suitable for high speed applications. Food contact approved.	1.42	Dry conditions: -40 °C to +93 °C (-40 °F to +200 °F) Wet conditions: -40 °C to +60 °C (-40 °F to +140 °F)	Light brown for Flexi Chains: White
PT	Low-friction POM (Acetal) ¹⁾ The material shows a low coefficient of friction, high strength and good abrasion resistance. Suitable for high speed applications with reduced lubrication	1.43	Dry conditions: -40 °C to +93 °C (-40 °F to +200 °F) Wet conditions: -40 °C to +60 °C (-40 °F to +140 °F)	Gray-brown for Flexi Chains: White
TS	Extra low-friction POM (Acetal) ¹⁾ with special self-lubricating agents. This material has the lowest friction values and highest PxV (load and speed) limit.	1.43	Dry conditions: -40 °C to +93 °C (-40 °F to +200 °F) Wet conditions: -40 °C to +60 °C (-40 °F to +140 °F)	Silver
NG	Extra low friction PBT material with good strength and very good abrasion resistance. Suitable for high speed, dry running applications. Should be used in combination with a high performance corner track.	1.34	Dry conditions: -40 °C to +120 °C (-40 °F to +248 °F) Wet conditions: -40 °C to +50 °C (-40 °F to +122 °F)	Gray

Plastic chains – Special chain materials				
Material	Description	Density [g/cm ³]	Temperature range	Standard color
For special materials, strength reduction and dimensional variation to be expected. Please consult with Habasit Engineering.				
PK	Extra wear-resistant aramid fiber-filled POM (Acetal) ¹⁾ . The special formulation ensures good wear resistance and a low coefficient of friction, especially for abrasive, wet or dry running applications.	1.41	Dry conditions: -40 °C to +93 °C (-40 °F to +200 °F) Wet conditions: -40 °C to +66 °C (-40 °F to +151 °F)	Dark gray
EC	POM (Acetal) ¹⁾ with an electrical surface resistivity according to IEC60093 / ASTM D257 below 10 ⁷ Ohm/sq. Material has high strength and a good coefficient of friction. Especially for applications where chain charge-up must be avoided. To be used with a conductive wear strip.	1.42	Dry conditions: -40 °C to +93 °C (-40 °F to +200 °F)	Black

¹⁾ POM (Acetal) generally shows good resistance to oil and alkalines and has a cut-resistant surface.

Plastic chains – Special chain materials				
Material	Description	Density [g/cm ³]	Temperature range	Standard color
DE	POM (Acetal) ¹⁾ with a special additive to ensure the material is detectable for metal and X-ray systems.	1.67	Dry conditions: -40 °C to +93 °C (-40 °F to +200 °F) Wet conditions: -40 °C to +66 °C (-40 °F to +151 °F)	Blue
NY	PA with high strength and abrasion resistance. Material has very good long-term heat resistance. Suitable for high load, dry conditions and elevated temperatures. Flammability rating UL94 V2	1.14	Dry conditions: -46 °C to +118 °C short-term +135 °C (-50 °F to +245 °F) short-term +275 °F Wet conditions: not recommended	Dark gray
WR	Extra wear-resistant PA for dry and abrasive applications (glass). Higher wear resistance than NY with a low coefficient of friction. When using this material, it is necessary to use a synthetic lubricating agent (no water).	1.35	Dry conditions: -18 °C to +82 °C (0 °F to +180 °F) Wet conditions: not recommended	Black
HT	Reinforced PA with very high strength and toughness. Suitable for high loads, dry conditions, at elevated temperatures. Flammability rating UL94 HB.	1.37	Dry conditions: -40 °C to +145 °C short-term +175 °C (-40 °F to +293 °F) short-term +347 °F Wet conditions: not recommended	Black
NP	PBT with good strength and low coefficient of friction. Developed for conveying applications in the tobacco industry.	1.30	Dry conditions: -40 °C to +120 °C (-40 °F to +248 °F) Wet conditions: -40 °C to +50 °C (-40 °F to +122 °F)	Natural white
PP	Glass fiber reinforced PP designed for demanding applications where a high level of chemical resistance is required.	1.13	+5 °C to +105 °C (+40 °F to +220 °F)	Natural white
CR	Extremely chemical resistant fluorinated thermoplastic material. Good strength, low friction and good abrasion resistance. Especially for applications with high demands for chemical or hot water resistance.	1.78	Dry conditions: +5 °C to +115 °C (+40 °F to +239 °F) Wet conditions: +5 °C to +115 °C (+40 °F to +239 °F)	White

Steel chains				
Material	Description	Density [g/cm ³]	Temperature range	Standard color
CS	Carbon steel - 43 HRC	7.85	Wet conditions: not recommended Dry conditions: -40 °C to +180 °C (-40 °F to +355 °F)	Black
SS	Inox for standard applications - Ferritic stainless steel, magnetic qualities, and good chemical resistance. Suitable for most applications and environments.	7.90	Dry conditions: -40 °C to +260 °C (-40 °F to +500 °F) Wet conditions: -40 °C to +120 °C (-40 °F to +248 °F)	Gray
SH	Hard Inox for high strength applications - Martensitic stainless steel, magnetic qualities, better mechanical resistance and less chemical resistance, Ra < 0.3	7.70	Dry conditions: -40 °C to +260 °C (-40 °F to +500 °F) Wet conditions: -40 °C to +120 °C (-40 °F to +248 °F)	Gray
SA	18/8 SS with high chemical resistance - Austenitic stainless steel, non-magnetic, with better chemical resistance and wear resistance, but less mechanical strength. Used in tough environments or for esthetic reasons.	7.90	Dry conditions: -40 °C to +400 °C (-40 °F to +752 °F) Wet conditions: -40 °C to +120 °C (-40 °F to +248 °F)	Gray

Pins				
Material	Description	Density [g/cm ³]	Temperature range	Standard color
J	Case hardened carbon steel (steel chains only)	7.85	Wet conditions: not recommended Dry conditions: -40 °C to +180 °C (-40 °F to +355 °F)	Gray
K	Standard applications - Ferritic stainless steel, magnetic qualities, and good chemical resistance. Suitable for most applications and environments. Standard pin for plastic and steel chains. AISI 430 for plastic chains, and AISI 431 for steel chains (Previous code SS).	7.90	Dry conditions: -40 °C to +260 °C (-40 °F to +500 °F) Wet conditions: -40 °C to +120 °C (-40 °F to +248 °F)	Gray
P	High chemical resistance - Austenitic stainless steel, non-magnetic, with better chemical resistance and wear resistance, but less mechanical strength. Used in tough environments or for esthetic reasons. AISI 304 (Previous code SA)	7.90	Dry conditions: -40 °C to +400 °C (-40 °F to +752 °F) Wet conditions: -40 °C to +120 °C (-40 °F to +248 °F)	Gray
Q	High chemical resistance - Austenitic stainless steel, non-magnetic with increased resistance to chloride corrosion. AISI 316 (Previous code IN)	7.90	Dry conditions: -40 °C to +400 °C (-40 °F to +752 °F) Wet conditions: -40 °C to +120 °C (-40 °F to +248 °F)	Gray

Pins				
Material	Description	Density [g/cm ³]	Temperature range	Standard color
L	Wear and fatigue resistant highly reinforced Polyamide. Easy to recycle option for plastic chains. (Previous code PA)	1.55	Dry conditions: -40 °C to +145 °C short-term +175 °C (-40 °F to +293 °F) short-term +347 °F Wet conditions: not recommended	Natural beige
N	Extra low friction PBT material with good strength and very good abrasion resistance. Easy to recycle for selected plastic chains. (Previous code NG)	1.30	Dry conditions: -40 °C to +120 °C (-40 °F to +248 °F) Wet conditions: -40 °C to +50 °C (-40 °F to +122 °F)	Natural white

Sprockets				
Material	Description	Density [g/cm ³]	Temperature range	Standard color
GS	Reinforced polyamide with high strength and wear resistance for long life Multi-Hub sprockets.	1.37	Dry conditions: -46 °C to +118 °C (-50 °F to +245 °F) Wet conditions: -40 °C to +50 °C (-40 °F to +122 °F)	Black
ND	Tough, wear resistant and noise dampening material for Multi-Hub sprockets.	1.24	-20 °C to +50 °C (-4 °F to +120 °F)	Dark gray
PE	Tough, wear resistant and noise dampening UHMWPE. Not suitable for abrasive applications. For machined sprockets.	0.94	-70 °C to +65 °C (-94 °F to +150 °F)	Natural white
NY	High heat resistant, good abrasion resistant polyamide sprocket material. For machined sprockets.	1.14	Dry conditions: -46 °C to +118 °C short-term +135 °C (-50 °F to +245 °F) short-term +275 °F Wet conditions: not recommended	Natural white
L	Extra low friction POM (Acetal) with self-lubricating agent for Multi-Hub idler and moulded sprockets.	1.41	Dry conditions: -40 °C to +93 °C (-40 °F to +200 °F) Wet conditions: -40 °C to +60 °C (-40 °F to +140 °F)	Black
CI	Cast iron for solid sprockets. Suitable in non-corrosive, abrasive environments, such as glass conveying.	7.85	Dry conditions: -40 °C to +180 °C (-40 °F to +355 °F) Wet conditions: not recommended	Black

Accessories				
Material	Description	Density [g/cm ³]	Temperature range	Standard color
G	For GripTop inserts on Slat Top Plastic Chains	1.16	-40 °C to +60 °C (-40 °F to +140 °F)	Black or White
PL	For GripTop inserts on Slat Top Plastic and Snap-on Chains	1.14	-40 °C to +80 °C (-40 °F to +176 °F)	Black or White
HY	For GripTop inserts on Slat Top Plastic and Snap-on Chains	1.20	-40 °C to +110 °C (-40 °F to +230 °F)	Black or white
PP	Polypropylene glass fiber reinforced, for retainer rings	1.13	+5 °C to +105 °C (+40 °F to +220 °F)	Blue

HabaCHAIN®

Slat Top 770T (radius)

Description

- Radius running plastic tab chain
- Small pitch for smooth product transfer with short dead plates
- Capable to run on corner discs
- 1061 hinge design = identical sprocket for 770 and 1061 series chains
- For conveyor layouts requiring tight turns
- For side transfer with 820 and 828 series straight running chains

Inserts

Inserts can be fitted into most Slat Top plastic chain types to increase the friction between product and chain. This is beneficial for incline or decline applications.

1. Serial inserts (e.g. 882TG)

- Standard insert material is G
- 65 Shore A hardness
- Heavy duty insert

2. Custom inserts

- Standard insert material PL (other materials like HY available)
- 85 Shore A hardness (other hardness grades available in other materials)
- Available as individual links or assembled into chain lengths (standard packaging: 3.048 m = 10 ft)
- For order code of special building pattern see page "Nomenclature"
- Custom insert dimensions are shown in the table below

Chain type		Chain width	Insert type	Insert width L	
				mm	inch
820 / 831		325	XA	60	2.36
		400 (only 820)		90	3.54
		450		105	4.13

Type XB

This is only a brief overview of our inserts. Many different insert designs are available.

Slat Top plastic accessories

Drilled holes

For special applications (e.g. vacuum) when holes in Slat Top chains are needed, we offer HabaCHAIN® Slat Top plastic chains with custom-made drilled holes. The holes are drilled on a dedicated CNC machine according to the pattern specified by the customer. All types of hole shapes (not only round) can be machined. For further information and availability please contact your local Habasit partner.

HabaCHAIN®

Slat Top 810 (straight)

Pin material: case hardened carbon steel (for CS chain), stainless steel (for SS, SH and SA chain)

- Standard packaging: 3.048 m = 10 ft
- The weight specification is indicative
- Bakery bends available

Related products

Description

So called “bakery bends” are bended top plates of Slat Top steel chains. Bakery bends are used in the bakery industry for products discharged from ovens. The bended edge ensures a smooth product transfer. Bakery bends are available for 810 and 881T chain type in CS and SA material as indicated in the table below. The top plate of the Slat Top steel chain will be bended according to the dimensions in the drawing below.

Nomenclature:

- One side bent in travel direction on the right side suffix: -R1
- One side bent in travel direction on the left side suffix: -L1
- Both sides bent suffix: -RL

Description

- Radius running conveyor system plastic chain
- Easy assembly and disassembly
- Openings for cleaning with compressed air
- Capable to run on corner discs
- For conveyor layouts requiring tight turns

Base chain:

- Standard material is CS
- Stainless steel (SS) on request: Max. workload 3000 N (675 lbf)
- Nomenclature for base chain only:
 - C0863B0075CS
 - C0863B0075SS
- Standard packaging: 3.048 m = 10 ft (including one connecting link)
- The weight specification is indicative
- Other top plate material available on request
- Top plates may be purchased separately
- Driven by standard ANSI 60-1 series roller chain sprockets

HabaCHAIN®

Snap-on 963 (straight)

52

Description

- Straight running snap-on chain
- Steel base roller chain with snap-on plastic top plates
- Base chain: 0.75" pitch 1873 roller chain

Base chain:

- Standard material is CS
- Stainless steel (SS) on request: Max. workload 2'000 N (450 lbf)
- Nomenclature for base chain only:
 - C1873B0075CS
 - C1873B0075SS
- Standard packaging: 3.048 m = 10 ft (including one connecting link)
- The weight specification is indicative
- Other top plate material available on request
- Top plates may be purchased separately
- Driven by standard ANSI 60-1 series roller chain sprockets

Inserts

Custom inserts can be fitted into most Snap-on Chain types to increase the friction between product and chain. This is beneficial for incline or decline applications.

- Standard insert material is PL (other materials like HY on request)
- Chain links with inserts can be ordered either individually or ready-built into chain lengths (standard packaging: 3.048 m = 10 ft)
- For order code of special building pattern see page "Nomenclature"
- Standard insert dimensions are shown in the table below

Chain type		Chain width	Insert type	Insert width L	
				mm	<i>inch</i>
863 / 963		325	XA	60	<i>2.36</i>
		450		105	<i>4.13</i>
		600		130	<i>5.12</i>
		750			
1873T		325	XA	60	<i>2.36</i>
		450		90	<i>3.54</i>
		600		130	<i>5.12</i>
		750			
		1000		200	<i>7.87</i>
	1200	XB	295	<i>11.61</i>	

Type XA

Type XB

This is only a brief overview of our inserts. Many different insert designs are available. For further information and availability please contact your local Habasit partner.

- Loose Snap-on plastic top plates are available on request (suffix TP). Minimum delivery is 25 pieces.
- Connecting links are available on request
- For order code see page "Nomenclature"

HabaCHAIN®

Multiflex 1700 (radius)

Description

- Multiflex plastic chain with wide top plate
- Capable to run on corner discs
- For conveyor layouts requiring tight turns

Chain data

- Pin material:** stainless steel
- Standard packaging: 3.048 m = 10 ft
 - The weight specification is indicative
 - Other materials on request

Related products

- Solid sprocket – Series 1700
- Turning discs

Extended pivots and inserts can be fitted to the multiflex range of chains. Inserts are beneficial for incline or decline applications where the extended pivots can be used for a variety of applications where the product is required to be spaced, held or pushed where the stand alone chain is not sufficient. Both inserts and extended pivots are available in standard arrangements as well as to customer requirements.

Custom dimensions and arrangements available by request.

Turn disc are available for the Multiflex range of chains. Turn discs are used as moving inside wearstrips for turns. By using the turn disc, the chain can go through a curve without significantly increasing the chain tension, consequently, allowing longer conveyors. It is recommended to utilize turn disc for multiflex chains.

Turn disc type	Chain type	Center of disc to center of chain		Weight	
		mm	inch	kg	lbs
C1700D12	C1700K0217--AA	150	5.91	1.39	3.05

	C1702K0209--AA	150	5.91	1.32	2.90

- Material:**
- Disc: Cast aluminum
 - Shaft: Stainless steel

HabaCHAIN®

Case chain 40P (straight)

67

Description

- Small straight running plastic chain with closed top plate
- Driven by standard 0.5" (12.7 mm) pitch steel roller chain sprocket
- For applications requiring a closed top plate design that eliminates pinch points

Chain data

Habasit code	Width W		Weight		Nominal tensile strength F_N		Material
	mm	inch	kg/m	lb/ft	N	lbf	
C0040P0079DPAA-001	20.0	0.79	0.37	0.25	630	141	DP

Pin material: stainless steel

- Standard packaging: 15.24 m = 50 ft
- The weight specification is indicative
- Other materials on request
- Driven by standard ANSI 40-1 or BS 08B-1 roller chain sprockets

HabaCHAIN®

Case chain 60P (straight)

Description

- Small straight running plastic chain with closed top plate
- Driven by standard 0.75" (19.1 mm) pitch steel roller chain sprocket
- For applications requiring a closed top plate design that eliminates pinch points

Chain data

Description

Different accessories for case chains are available, including extended pins, pushers and attachment points.

Extended pin EP (only for straight running chains)

Extended journal pins (standard material is stainless steel SA) are particularly advantageous for low tension accumulation, eliminating damage to product and containers.

Description

Habasit has invented a new type of modular split sprockets and split idlers called Multi-Hub. Interchangeable hub inserts in various diameters with or without keyway and sprocket, or idler rims in two different materials, reduce the inventory needed by customers. With this Multi-Hub system it is possible to combine a noise dampening sprocket rim with a stiff and wear resistant hub. The customized choice of materials and high fabrication accuracy ensure long lifetime and optimized power transmission.

Complete Multi-Hub sprocket in noise dampening material ND

1. Complete Multi-Hub sprocket
2. Interchangeable idler rim with screws
3. Interchangeable sprocket rim with screws
4. Interchangeable hub insert: round bore with keyway for drive applications
5. Interchangeable hub insert: plain round bore for idler applications

For imperial shaft sizes hub inserts with set screw are available on request.

HabaCHAIN®

Multi-Hub 820 sprocket rims

Description

- Multi-Hub 820 sprocket rim is suitable for 810, 820 and 831 series chains
- The split sprocket rim has molded guide rings
- Different bore configurations can be obtained by using separate Multi-Hub inserts

Multi-Hub 821 sprocket rims

Description

- Multi-Hub 821 sprocket rim is suitable for 800 and 821 series chains
- Consisting of two Multi-Hub 881 sprockets set up side-by-side
- Different bore configurations can be obtained by using separate Multi-Hub inserts

Sprocket data

Related products

- Multi-Hub inserts

Description

- Available with round bore only (RL type) or with metric keyway according to ISO standard or imperial keyway according to ANSI standard (RZ type) or square bore (QZS type).
- RZ types are designed to clamp on standard shafts and are suitable for drive applications with all Multi-Hub sprocket rims
- QZS types need retainer rings for axial fixation.
- RL types are designed to spin free on standard shafts
- RL types consist of extra low friction POM (Acetal) material for optimal sliding properties
- RL type inserts can be used for Multi-Hub sprocket rims (intended to be used as an idler) and Multi-Hub idler rims
- Set screw fixation option for imperial bores only.

(Inserts for chains are only “small” type)

- For hub type see page “Nomenclature”
- Available bore sizes:
Round [mm] 25, 30, 35, 40, 50, 60
Round [inch] 1, 1 3/16, 1¼, 1½, 2, 2½
Square [mm] 25, 40, 50, 60
Square [inch] 1, 1½, 2, 2½

Description

- Solid sprocket 1400 is suitable for all 1400 series chains
- Bore configurations can be machined according to the customer requirements

- Included in delivery: 2 retainer ring halves, 2 screws, 2 self-locking nuts
- Nuts and screws: stainless steel

Appendix

Chemical resistance – Plastics

The data presented in the following table is based on information provided by the raw material manufacturers and suppliers. It does not replace the need to test the products for your application. In individual cases, the stability of the material in the medium in question must be examined.

Code: ● = Good resistance ○ = Conditionally/sometimes resistant ○ = Not resistant (do not use)

The data in this table is taken from laboratory tests, performed on unstrained test samples. It should be considered as purely indicative, since material behavior under real working conditions depends on different factors, including: temperature, concentration of the chemical agent, and speed or long-lasting effect of the chemical agent.

With thermoplastic products, do not use cleaning or lubricating agents with pH values below 4 or above 10.

When connecting or disconnecting a chain, always turn off and lock out the power switch before starting. Always use goggles to protect your eyes. Wear protective clothing, gloves and safety shoes. Support the chain to prevent uncontrolled movements. Use appropriate tools in good working condition, and use the correctly in a proper manner. Do not attempt to connect or disconnect the chain without full knowledge of the chain construction, including the correct procedure for pin removal or insertion.

All pinch and shear points, along with all other exposed moving parts that pose a potential hazard to people at workstations or on conveyor passageways, must be safeguarded.

Overhead conveyors must have guards to prevent objects from falling. Cleated conveyor chains are more hazardous, creating pinch and shear points.

Safeguarding can be achieved by:

Identification

Identify all hazardous areas that pose a danger to personnel.

Guard barriers

Place guard barriers to prevent entry into the hazardous area, and apply guards to high conveyors to prevent objects from falling on to personnel below.

Control devices

Set machine controls to prevent hazardous operations/conditions.

Warnings

Use instructions, warning labels, or sound/light signals to alert that a hazardous condition exists.

Safeguarding should be designed to minimize any discomfort or difficulties for operators. Bypassing and/or overriding safeguarding mechanisms during operation should not be allowed.

Any safeguarding concerns regarding the conveyor should be addressed during the design process.

Product safety

Products designed and manufactured by Habasit can

be used in a safe manner; but Habasit cannot warrant their safety under all circumstances. PURCHASER MUST INSTALL AND USE THE PRODUCTS IN A SAFE AND LAWFUL MANNER IN COMPLIANCE WITH APPLICABLE HEALTH AND SAFETY REGULATIONS AND LAWS AND GENERAL STANDARDS OF REASONABLE CARE; AND IF PURCHASER FAILS TO DO SO, PURCHASER SHALL INDEMNIFY HABASIT FROM ANY LOSS, COST OR EXPENSE RESULTING DIRECTLY OR INDIRECTLY FROM SUCH FAILURE.

SAFETY DEVICES: Products are provided with only the safety devices identified herein.

IT IS THE RESPONSIBILITY OF PURCHASER TO FURNISH APPROPRIATE GUARDS FOR MACHINERY PARTS IN COMPLIANCE WITH MSHA OR OSHA STANDARDS, AS WELL AS ANY OTHER SAFETY DEVICES DESIRED BY PURCHASER AND/OR REQUIRED BY LAW; AND IF PURCHASER FAILS TO DO SO, PURCHASER SHALL INDEMNIFY HABASIT FROM ANY LOSS, COST OR EXPENSE RESULTING DIRECTLY OR INDIRECTLY FROM SUCH FAILURE.

General safety precautions

- To avoid personal injury, all machinery must be turned off and locked out, prior to chain installation, inspection, maintenance and removal
- Always use safety glasses to protect eyes. Wear protective clothing, gloves and safety shoes
- Support the chain to prevent uncontrolled movement of the chain and parts
- Maintain tools in proper condition and ensure their proper use. Use of chain assembly tools is recommended when applicable
- Do not attempt to connect or disconnect chain unless chain construction is clearly known and understood
- Do not use any sections of damaged chains, because they may have been overloaded and yielded

If any flame cutting, welding, etc. is done in the conveyor vicinity, take adequate precautions to ensure that no burning of any chain or other components occurs. If adequate protection cannot be provided, remove the chain and other plastic components from the conveyor and store in a safe location. Thermoplastic and similar materials can burn and give off toxic fumes. **DO NOT INSTALL, OPERATE OR PERFORM MAINTENANCE ON THIS PRODUCT UNTIL YOU HAVE READ AND UNDERSTOOD THE INSTRUCTIONS CONTAINED IN THIS MANUAL.**

Customers first

Your success is our goal. That is why we don't just offer products; we provide solutions. As committed partners to our customers, we are dedicated to sharing our knowledge and providing full support.

Since our founding in 1946, Habasit has been finding ways to meet customer-specific needs in every application. This is what differentiates us as the #1 worldwide belting provider in the industry today.

Comprehensive consulting and technical support

Profit from the best consulting and technical support in the lightweight belting industry. Local experts are always available to assist you with your belting needs. The Habasit team is proud to provide the highest level of support, together with top-quality products that have led the global market for decades.

Belt selection and calculation assistance

We are always glad to help you select the most suitable belt for any application for your convenience. We now also provide the free online tool 'SeleCalc' which allows you to easily make selections and calculations yourself. Simply register online at selecalc.habasit.com.

Fabrication, assembly and local installation services

As a full-service belting provider, we offer joining and assembly services either at our own locations or directly on your equipment.

Habasit has over 30 affiliates worldwide, each with its own inventory, fabrication, assembly and service facilities.

Together with representative offices and numerous qualified distributors, we can react quickly and efficiently to meet all your needs.

Customer training programs

To ensure the optimal performance and maximum lifespan of all our products, we offer training programs and various support tools. This includes proper procedures for fabrication, installation, assembly, maintenance and belt repair, all of which take place at a Habasit site or at your location.

Belt monitoring, inspections, analyses and process optimization proposals

We organize and handle belt maintenance, inspections, analyses and surveys at customers' sites. Upon request, we are ready to develop optimization proposals to ensure you're getting maximum value from your machinery and process output.

Design assistance for customized solutions

Habasit believes in building partnerships with our customers. Our engineering team will work closely with your engineers on joint design developments from initial design to final implementation. This expert service can be invaluable for projects involving new technologies or large-scale modifications and adaptations.

Committed to innovation

Because our customers' belting challenges and needs are always changing, we consistently invest a substantial amount of labor and resources into the research and development of new products and solutions.

Certified for quality

We deliver the highest quality standards not only in our products and solutions, but also in our employees' daily work processes. Habasit AG is certified according to ISO 9001:2015.

Worldwide leading product range

Habasit offers the largest selection of belting, conveying, processing and complementary products in the industry. Our response to any request is nothing less than a specific, tailor-made solution.
